The application has been amended as follows:

a) Please replace claim 2 with the following: --

2. The method according to claim 1, further comprising the following steps:
limiting the amplitude level of the received signal S;

correlating the received signal with the reference number R for each said frequency F(1)...F(M), storing the K greatest correlation values of the signal and their position corrected by a known delay T(1)...T(M); and

for a given temporal position, summing the K greatest selected values having this position and preserving the greatest sum as the greatest combined value. --

Allowable Subject Matter

2. Claims 1-15 are allowed.

3. The following is an examiner's statement of reasons for allowance: None of the prior art teaches or suggests a frequency hopping system comprises for frequency F(1)-

--F(M), selecting K samples corresponding to the greatest values of the signal for their corresponding positions; combining the M greatest values each selected and generating combined values for each position and keeping the greatest combined value and corresponding position; comparing the greatest combined value with a threshold value, and if the greatest combined value is greater than the threshold value, then declaring the detection of the signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
